

Viruses Are Not What We Were Taught

I've been interested in "health" and particularly viruses for years.

I was taught things like¹:

- ① "Viruses have very high 'intelligent quotients.'
- ② "They can also be very sly and shifty, as well as self-serving."
- ③ "The virus has at its disposal a wide array of tricks, deceptions and improvisations that can be used to accomplish a given goal at almost any time." And...

④ That viruses invade convert your cells "into a virus factory" reproducing themselves millions of times and making you sick.

⑤ That viruses CAUSE: Colds, influenza, SARS, MERS-CoV, SARS-CoV2 (Covid-19), polio, measles, mumps, chicken pox, Hepatitis, herpes and more.

BUT then I discovered...

① Viruses don't meet the biological definition of "living" (in spite of the use of the term "live" virus).

② NO ONE has ever truly isolated, purified, characterized and satisfied Koch's Postulates to PROVE that ANY "virus" is the cause of ANY of the diseases listed above. And...

③ "Viruses **are, in fact, particles produced by the cells themselves** as a consequence of certain stress factors such as drugs."³ They're actually harmless and beneficial to our own bodies.

④ "These particles are **then identified by antibody and PCR tests** and interpreted as epidemic-causing viruses."³

⑤ In short, **Viruses don't float around in the air trying to infect you** i.e. they aren't "catchy."

Vaccines are therefore contraindicated, meaningless and worse... very dangerous.

Jack McElroy and Jenna McElroy Kleiser at the World Vaccine Congress and Expo in 2013. This is THE show for movers and shakers in the Global Vaccine Industry held yearly in Washington, DC.
